

6 Six Sig^{CMT}

Quality & Lean Consulting. Management. Trade.

Lean Six Sigma Training

• One Day LSS

Duration: 1 day

Description: An overview of Lean Six Sigma methods and continuous improvement culture. During this training, students will learn the history and purpose of Lean and Six Sigma methods, understand the basic concepts and key metrics to watch for. A generic example will be used to illustrate the tools, and a fun quizz will end the day. Each student will receive printed material with the course content and a signed certificate for the completion of the course.

Content: History of LSS. Basic Statistics. DMAIC & DFSS. Process mapping. Lean principles. Continuous improvement.

Audience: The One Day LSS course is designed for employees and individuals involved in business processes as well as executives who need to understand the potential benefits of implementing Six Sigma methods in their business. No specific quality background knowledge is required, but a scholar understanding of mathematics and statistics.

Location: Course available in-situ (your premises) anywhere in the world. We can also organise trainings in Brussels or in Budapest (up to 20 students). For any on site training, a meeting or training room with projection device is required. Course language is English or French.

Prices: 600€ to 1000€

These prices are valid for a class of 10 students or less, on the premise of customer. Additional fees may apply for extra trainees. External courses can be organized on demand and for any number of trainee (seminars, training days). Contact us for a quote!
