

# 6 Six Sig<sup>CMT</sup>

## Quality & Lean Consulting. Management. Trade.

# Lean Six Sigma Training

## • One Day Lean

Duration: 1 day

Description: Introduction on Lean manufacturing concepts and tools. During this training, students will learn the history and purpose of Lean manufacturing, understand the basic concepts and key tools to use for quick simplification and waste elimination. A customized example will be used to illustrate the tools, and a fun quizz will end the day. Each student will receive printed material with the course content and a signed certificate for the completion of the course.

Content: History of Lean. Words & Tools. 5s. 7 wastes. Value stream mapping. Lean in practice.

Audience: The One Day Lean course is designed for employees and individuals involved in business processes simplification as well as executives who need to understand the potential benefits of implementing Lean methods in their business. No specific quality background knowledge is required, but a scholar understanding of mathematics and statistics as well as business processes concepts.

Location: Course available in-situ (your premises) anywhere in the world. We can also organise trainings in Brussels or in Budapest (up to 20 students). For any on site training, a meeting or training room with projection device is required. Course language is English or French.

Prices: 600€ to 1000€

These prices are valid for a class of 10 students or less, on the premise of customer. Additional fees may apply for extra trainees. External courses can be organized on demand and for any number of trainee (seminars, training days). Contact us for a quote!
